Subject: Smoking and Health - Pesticides

Date: September 24, 1974

C.C.:

The enclosed article September 12, 1974 from the "Milwaukee Journal" attacks the pesticides in tobacco, their harmfulness for the smoker and even for the non-smoker.

?

I wonder, if A. Holtzman, D. Hoel or L. Zahn know this Dr. H. Wyman Dorough? I think that this is another dangerous attack in the context of smoking and health, and I propose that other scientists should be asked for preparing an objective answer.
